EDUCATION

University of Southern California (Viterbi School of Engineering)

M.S. in Computer Science (Artificial Intelligence Track)

Los Angeles, CA
Aug 2025 – May 2027

GPA: 4.0/4.0

Coursework: Machine Learning, Analysis of Algorithms, Artificial Intelligence, Multimodal Probabilistic Learning, Deep Learning and Its Applications, Applied Natural Language Processing

Guru Gobind Singh Indraprastha University

B.S. in Artificial Intelligence & Machine Learning

Delhi, India
Nov 2021 – May 2025

GPA: 4.0/4.0 (9.45/10.00)

PUBLICATIONS

- **Kandpal, P.K.** *et al.* Time Series Forecasting of NSE Stocks Using Machine Learning Models (ARIMA, Prophet, Stacked LSTM). ICDAM 2023, Springer LNNS 788.
- **Kandpal, P.K.** *et al.* Text Summarization and Sentiment Analysis Using Transformer-Based Models: Comparative Analysis. InCITe 2024, Springer LNEE.

INDUSTRY EXPERIENCE

Novartis

Business Planning & Analysis (BPA) Analyst Intern - AI & Automation

East Hanover, NJ
Jun 2026 – Aug 2026

- Analyzed adoption dynamics in an emerging market for a novel cardiovascular therapy – where diagnostic testing didn't previously exist – and built a LightGBM model on early testing and market data to identify high-probability early adopters, helping teams prioritize outreach as the category was built from the ground up.
- Cut weekly performance reporting time from hours to minutes by building LLM-powered conversational agents on AWS Bedrock, pairing retrieval-augmented generation with a deterministic calculation layer for accurate, on-demand answers in place of manual spreadsheet work.

ZS Associates / Pfizer

Decision Analytics Associate Intern

Delhi, India
Feb 2025 – Jul 2025

- Developed an ML-based predictive targeting model (XGBoost + SHAP) to improve early-adopter identification, mitigate market penetration risk, and maximize commercial ROI.
- Built custom resource-allocation models to redistribute coverage across 16 portfolios, incorporating profitability analysis, budget constraints, and workload optimization.
- Executed A/B testing, ROI modeling, and coverage-gap clustering across APAC markets (Japan, Australia, NZ) to optimize capital allocation for promotional campaigns.
- Delivered interactive analytics solutions in Excel and Tableau adopted globally; awarded “Best Case Study Solution” and received a full-time conversion offer.

LunexAI

AI/ML Intern

Delhi, India
Aug 2023 – Nov 2023

- Co-developed a GPT-3 + ChromaDB content-generation engine for a pay-per-use SaaS platform, streamlining vector storage and preprocessing workflows to power real-time personalized recommendations.

TEACHING EXPERIENCE

University of Southern California

Course Producer / Grader – CSCI 561: Artificial Intelligence

Los Angeles, CA
Jan 2026 – May 2026

- Evaluated exams and mentored students in problem-solving and algorithmic reasoning.

ACADEMIC PROJECTS

Predicting Emotional Descent in Dyadic Interaction

- Formulated a predictive framework to identify the exact inflection points where two-person conversations deteriorate from calm to conflict, analyzing behavioral transitions across 20+ hours of dialogue.
- Developed a multimodal transformer architecture from scratch to align asynchronous audio (tone), visual (facial expressions), and text data; achieved an 86.7% accuracy, outperforming Gemini API baselines by 7.2 percentage points.

TECHNICAL SKILLS

Analytics & ML: PyTorch, LLMs, Transformers, Time Series Forecasting, A/B Testing, Predictive Modeling, Market Mix Modeling

Languages: Python (Pandas, NumPy, Matplotlib, Seaborn), SQL, R, C/C++

Tools & Frameworks: Excel, Tableau, Power BI, AWS, Snowflake, ChromaDB, Dataiku DSS, Databricks, Git
